

Kauri

Kauri

Kauri is startup **shared-economy and crowd-investment cryptocurrency**. It's an ERC-20 token created by company British Asset and is supposed to be basis of project's next phases. Kauri's **main goal is to systematically build** and expand **crypto-friendly investment ecosystem**, thereby helping cryptocurrencies mass adoption.

British Asset (since 2017) has already **fund raised and realized two hotels** through crowd-investment principles. **First** with auditory value over **6 million USD** (*Avatar Eco Lodge, via [booking.com](https://www.booking.com)*), **second one is under construction** (planned opening in 2019).

Kauri strategy

FÁZE 2 Obchodování s KAURI na kryptoburzách

po 12.12.2019

Kauri prodáš na kryptoburze

Kauri

například za Bitcoin

bitcoiny směniš ve WIREX apce na EUR, USD... na kartu

s kartou můžeš platit nebo vytáhnout cash v ATM

Pilot phases

1st phase

(22.1.-12.12.2019)

Community building

Creating grounds of Kauri ecosystem

Kauri presale

2nd phase

(12.12.2019+)

Exchange listings

Community expansion

Start of **Staking**

Value **stabilization**

3rd phase (2020)

- World's first cryptohotel** realization
- Kauri ecosystem development
- First **adoption of Kauri**
- First **investment opportunities** through **crowdfunding**

4th phase (2021+)

- Realization of **investment platform** for establishing and developing **businesses accepting Kauri**
- Strategic **use of currency in** startup project **fund raising**.
- Building other hotels** on Kauri model and accepting Kauri through **shared-economy hotels** and **investment platform businesses**

PILOT PHASES

We've **building strong grounds** for whole project to achieve its goals in there, intensive community work, establishing **strong fundamental value** and **valuable partnerships**. All along with fund-raising, it should **ensure safe progress** of the project.

CRYPTOHOTEL

In next phase, we're going to execute **world's first cryptohotel project**. Based on unique British Asset model is everybody able to **invest Kauri** into the hotel **through crowdfunding campaign**. So that they become its co-owners with **dividend right from 8% yearly** and owners rights to **free accomodation in the hotel**. This model has already proved itself to be working, so it is ,with the fact it's **world's first hotel** accepting **only cryptocurrencies**, begginging of really **unusual oportunity**.

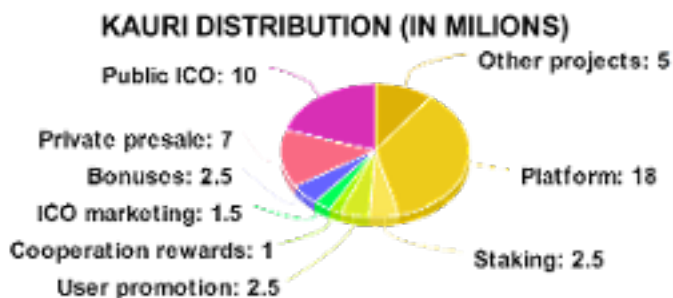

PLATFORM

Last startup phase brings **Kauri investment platform**. Inspired by crowdfunding model a **Angel Investment principles**, we've created sophisticated tool for **fund raising a startup investment**. Those **emerging new companies are part then of** the Kauri **ecosystem**, therefore **supporting** Kauri and other **cryptocurrencies** as well.

KAURI VALUE

We're doing our best to establish stable **value of Kauri** during internal presale and public ICO. The final **value/price** before expected **exchange listing (12nd december 2019)** should reach **1,5\$/Kauri**.

For actual state of the project **and Kauri's value**, check www.kauricrypto.com.

Staking

We've **created 50 milion tokens** in Kauri smart-contract. However **only part** of it will be **released into circulation** during project's early phases, **rest** will be **frozen and unlocked gradually through the time**.

The earliest **way for** those frozen **Kauri to be released** into circulation is **Staking**. Through which you can **lock your Kauri** and for that you **receive reward in form of** newly released **Kauri**.
